

# Healthcare cash flow management.

*Helping you meet the challenges of ICD-10*

## *Solutions to improve your financial health*

At Webster, we know how the new ICD-10 coding system can impact your finances. With more than 68,000 codes to manage, you're bound to experience more billing and payment errors. And that can slow down your cash flow in a big way.

That's why we have a team of bankers who specialize in healthcare. They understand the impact ICD-10 can have on your finances. And have the experience to know which solutions will work best for your cash flow needs, including:

- A revolving line of credit with check access\* and discounts
- Cash management services to improve your cash collection
- Personal attention and guidance to help you put your cash flow solutions into action

Having a team of dedicated healthcare bankers to help your practice thrive in the midst of change is our way of living up to you. So you can spend less time worrying about billing and more time caring for patients. And that's what matters most.
